Do not use CO2 extinguisher on this material. Do not use organic compounds on this material.

### **Specific Hazards Arising from the Chemical**

Strong Oxidizing agent. Dangerous fire and explosion risk when in contact with combustible materials.

### **Hazardous Combustion Products**

Decomposition will release oxygen, which will intensify a fire.

# Protective equipment and precautions for firefighters

In case of major fire and large quantities: Evacuate area. Fight fire remotely due to risk of explosion.

Closed containers of this material may explode when subjected to heat from surrounding fire.

Cool closed containers exposed to fire with water spray.

Firefighting equipment should be thoroughly decontaminated after use.

Avoid breathing fumes from fire exposed material.

#### **Explosion Data**

Sensitivity to Static Discharge N/A

# **6. ACCIDENTAL RELEASE MEASURES**

### Protective equipment and precautions for firefighters

**Personal Precautions** 

Spill area will be slippery. Wear appropriate protective materials. Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Keep unnecessary personnel away. Keep upwind. Keep out of low areas.

#### **Protective Equipment**

Wear protective gloves/ protective clothing, eye protection/ face protection.

# **Emergency Procedures**

Prevent further leakage or spillage if you can do so without risk. Evacuate area of all unnecessary personnel. Ventilate area. Eliminate all ignition sources. Avoid generation of vapors. Avoid contact with cellulose, paper, sawdust or similar substances. Risk of self-ignition or promotion of fires. Combustible materials exposed to hydrogen peroxide should be rinsed immediately with large amounts of water to ensure that all hydrogen peroxide is removed.

# **Environmental Precautions**

### **Environmental Precautions**

Avoid release to the environment. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

#### Methods and material for containment and cleaning up

#### Methods for Containment and cleaning up

Contain spillage, and then collect with non-combustible absorbent material such as clean sand, earth, diatomaceous earth and place in container for disposal according to local/national regulations.

### 7. HANDLING AND STORAGE

### **Precautions for safe Handling**

#### Handling

Do not get in eyes, on skin, or on clothing.

Wash thoroughly after handling.

Prevent product contamination.

Keep only in the original container.

Store in tightly closed container.

Emptied container retains vapor and product residue.

Observe all labeled safeguards until container is cleaned, reconditioned or destroyed.

Avoid contamination.

#### Conditions for safe storage, including any incompatibilities

#### **Storage**

Store in a tightly closed container. Store in a cool, dry, well ventilated area away from sources of ignition such as flame, sparks and static electricity. Store out of direct sunlight in a cool well-ventilated place. Store in original container. Store away from combustibles and incompatible materials.

#### **Incompatible Products**

Store separate from acids, alkali reducing agents, combustibles, metallic oxides, and organic materials.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### **Control Parameters**

### **Exposure Guidelines**

Chemical Name	ACGIH	OSHA	NIOSH
Hydrogen Peroxide	1 ppm	1 ppm	N/A

### **Appropriate Engineering Controls**

# **Engineering Measures**

Investigate engineering techniques to reduce exposures below airborne exposure limits or to otherwise reduce exposures. Provide ventilation if necessary to minimize exposures or to control exposure levels to below airborne exposure limits.

### Individual protection measures, such as personal protective equipment

### **Eye/Face Protection**

Where there is potential for eye contact, wear chemical goggles, and have eye flushing equipment immediately available.

## **Skin and Body Protection**

Wear appropriate chemical resistant protective clothing and chemical resistant gloves to prevent skin contact. When handling this material, gloves of the following type(s) should be worn: Neoprene, Polyvinylchloride, Impervious butyl rubber gloves. Wear a face shield, chemical goggles and chemical resistant clothing such as an approved splash protective suit made of SBR Rubber, PVC, Gore-Tex or HAZMAT Splash Protective Suit (Level A,B, or C) when Splashing may occur (such as connecting/disconnecting, mechanical first break). For foot protection wear boots made of NBR, PVC, polyurethane, or neoprene. Overboots made of Latex or PVC, as well as firefighter boots or specialized HAZMAT boots are also permitted. DO NOT wear any form of boot or overboots made of nylon or nylon blends. DO NOT use cotton, wool or leather as these materials react rapidly with higher concentrations of hydrogen peroxide. Rinse immediately if skin is contaminated. Remove contaminated clothing and shoes immediately. Thoroughly rinse the outside of gloves and protective clothing with water prior to removal. Completely submerge hydrogen peroxide contaminated clothing or other materials in water prior to drying. Residual hydrogen peroxide, if allowed to dry on materials such as paper, fabrics, cotton, leather, wood, or other combustibles can cause the material to ignite and result in fire. Clean protective

equipment before reuse. Provide a safety shower at any location where skin contact can occur. Wash thoroughly after handling.

## **Respiratory Protection**

Avoid breathing vapor or mist. Where airborne exposure is likely or airborne exposure limits are exceeded (if applicable, see above), use NIOSH approved respiratory protection equipment appropriate to the material and/or its components. Full face piece equipment is recommended and, if used, replaces need for face shield and/or chemical goggles. Consult respirator manufacturer to determine appropriate type of equipment for a given application. Observe respirator use limitations specified by NIOSH or the manufacturer. For emergency and other conditions where there may be a potential for significant exposure or where exposure limit may be significantly exceeded, use an approved full face positive-pressure, self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply.

### **Hygiene Measures**

Follow general industrial hygiene practices.
